MoveOn Phone Cover Pipeline & Financial Pricing Standard

Specification Version: 4.0 | **Project:** inventory/coverstore | **Status:** Production

1. System Architecture & Custom SKU Standard

Automates single-product asset acquisition from **moveon.global** with zero out-of-scope crawling. Features automatic material identification, in-place image translation in \gallery\ and \sku\, and custom SKU format: **[model]-[material]-[color]-[finish]** (e.g. RN8-SIL-WT-S).

2. Storage Hierarchy (Strict 2-Folder Structure)

Directory / File	Description & Purpose
`\[model]\[material]\gallery\`	Product showcase images (gallery_01.jpg ...). Translated in-place.
`\[model]\[material]\sku\`	Color/variant cover images named with custom SKU. Translated in-place.
`\inventory.csv & .xlsx`	20-column database with live dynamic pricing formulas and Google Sheets sync.
`\scripts\inventory_manager.py`	Syncs Google Sheet, preserves unit logistics costs, and computes financial metrics.

3. 20-Column Inventory & Financial Pricing Standard

Stock, Weight, and Image URL columns are removed. Price is shifted and renamed to product price (BDT). Dynamic Excel formulas are injected for landing cost, margin markup, retail rounding, and max discounts:

Col # / Header	Excel Col	Formula / Calculation Rule	Realme Neo8 Example
1. Product Name	`A`	Product title from MoveOn	`Suitable for Realme Neo8 Case...`
2. Product Code	`B`	Custom SKU standard	`RN8-SIL-WT-S`
3-6. Mat/Col/Model/Warr	`C - F`	Liquid Silicone, Antique White, Realme Neo8, No	`Material & variant metadata`
7-8. source link / link	`G - H`	Source label & MoveOn product URL	`https://moveon.global/...`
9. Local Image Path	`I`	Relative path to translated SKU image	`Realme Neo8/Liquid Silicone/sku/...`
10. product price	`J`	Wholesale procurement in BDT (MoveOn offer * 1.17)	`39.90 BDT`
11. china delivery	`K`	China domestic courier cost per unit	`10.00 BDT`
12. air shipping	`L`	Air freight cost share per unit	`50.00 BDT`
13. bd delivery	`M`	Bangladesh local courier share per unit	`5.00 BDT`
14. packaging	`N`	Fixed packaging cost per unit	`11.50 BDT`
15. printing	`O`	Fixed label printing cost per unit	`20.00 BDT`
16. other	`P`	Miscellaneous fees & contingencies	`0.00 BDT`
17. landing cost	`Q`	`=SUM(J{r}:P{r})`	`136.40 BDT`
18. margin	`R`	`=IF(Q{r}<300, Q{r}*1.4, IF(Q{r}<400, Q{r}*1.33, Q{r}*1.25))`	`190.96 BDT`
19. sell price	`S`	`=INT(R{r}/100)*100 + IF(MOD(ROUND(R{r},0),100)<25, 0, IF(MOD(ROUND(R{r},0),100)<=74, 49, 99))`	`199 BDT (Ending in 99)`
20. max discount	`T`	`=IF(S{r}<300, 0, MIN(99, IF(S{r}<500, S{r}*7%, IF(S{r}<700, S{r}*12%, S{r}*15%))))`	`0.00 BDT (< 300 cutoff)`
